

macOS 13+ Ventura

Premiere Pro 26.2+

Internet for activation

1

Install VertForge

Double-click **VertForge.ccx**

Creative Cloud installs it — accept the third-party warning.

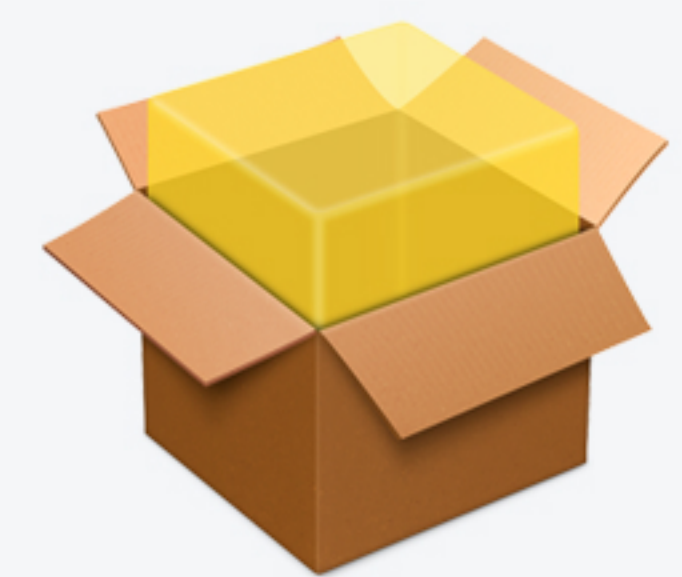

2

Install the VQF Engine

Run **VQF_Engine.pkg**

Follow the prompts. Restart if asked.

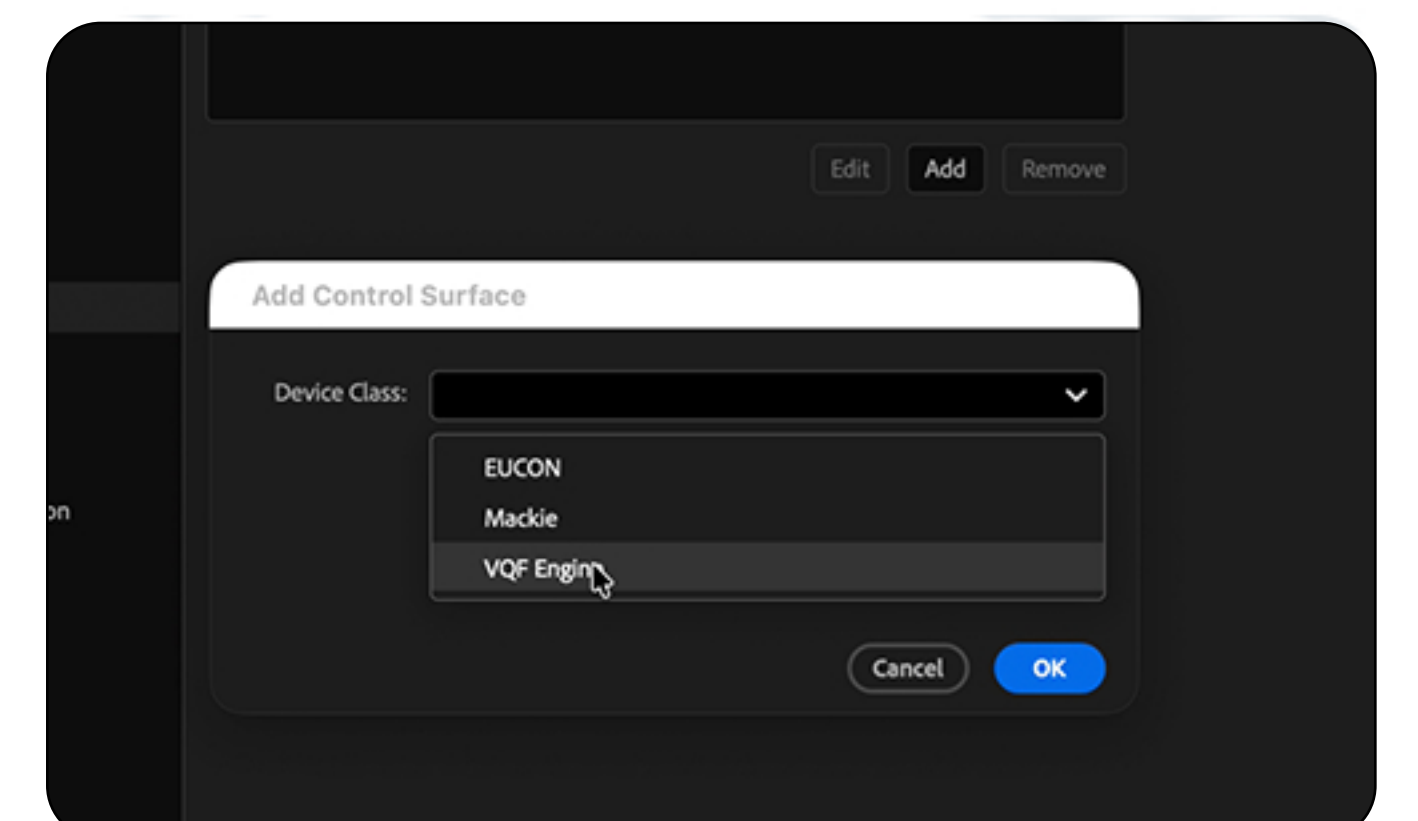

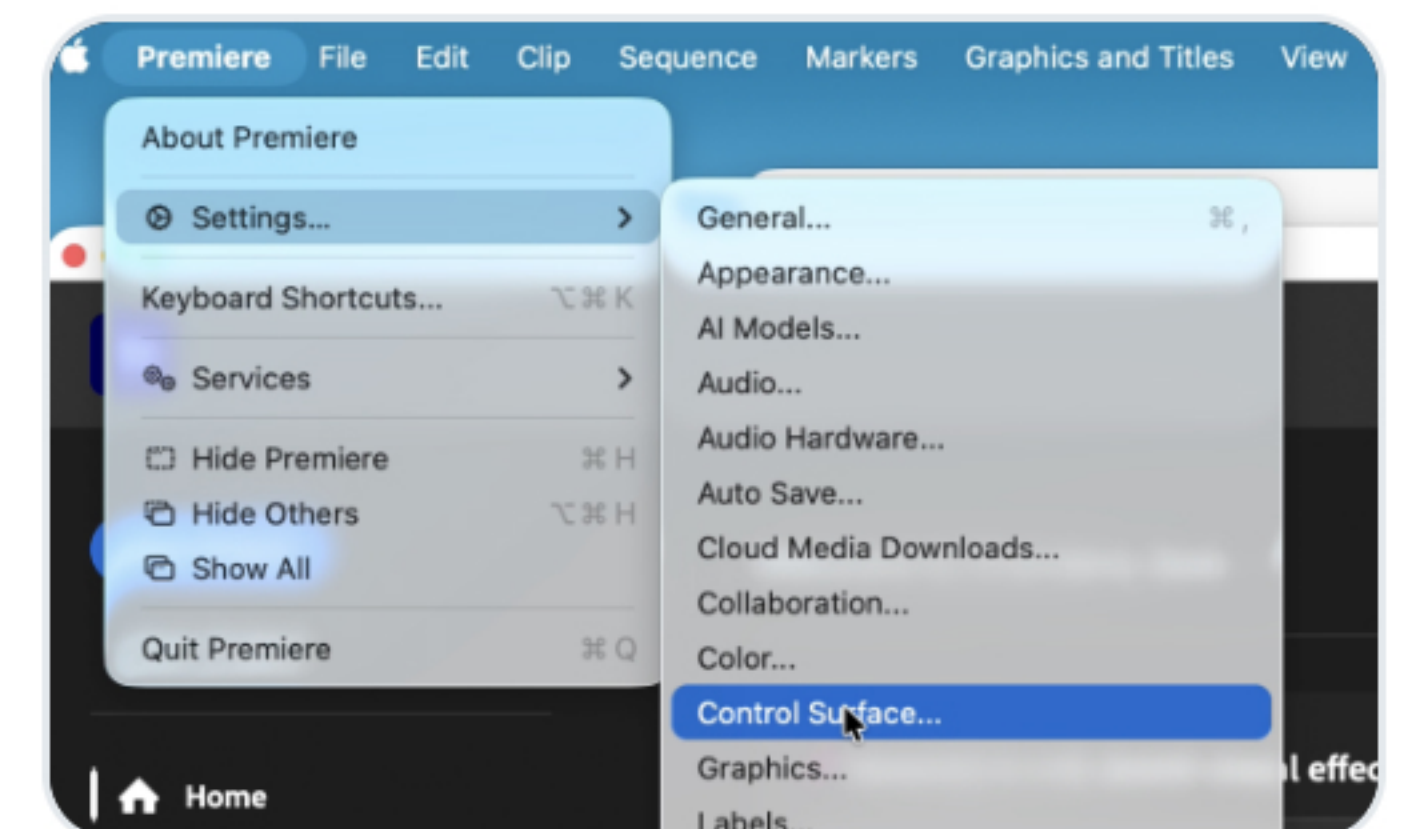

3

Add the Control Surface

Premiere → Settings → Control Surface

Click Add → choose VQF Engine → OK.

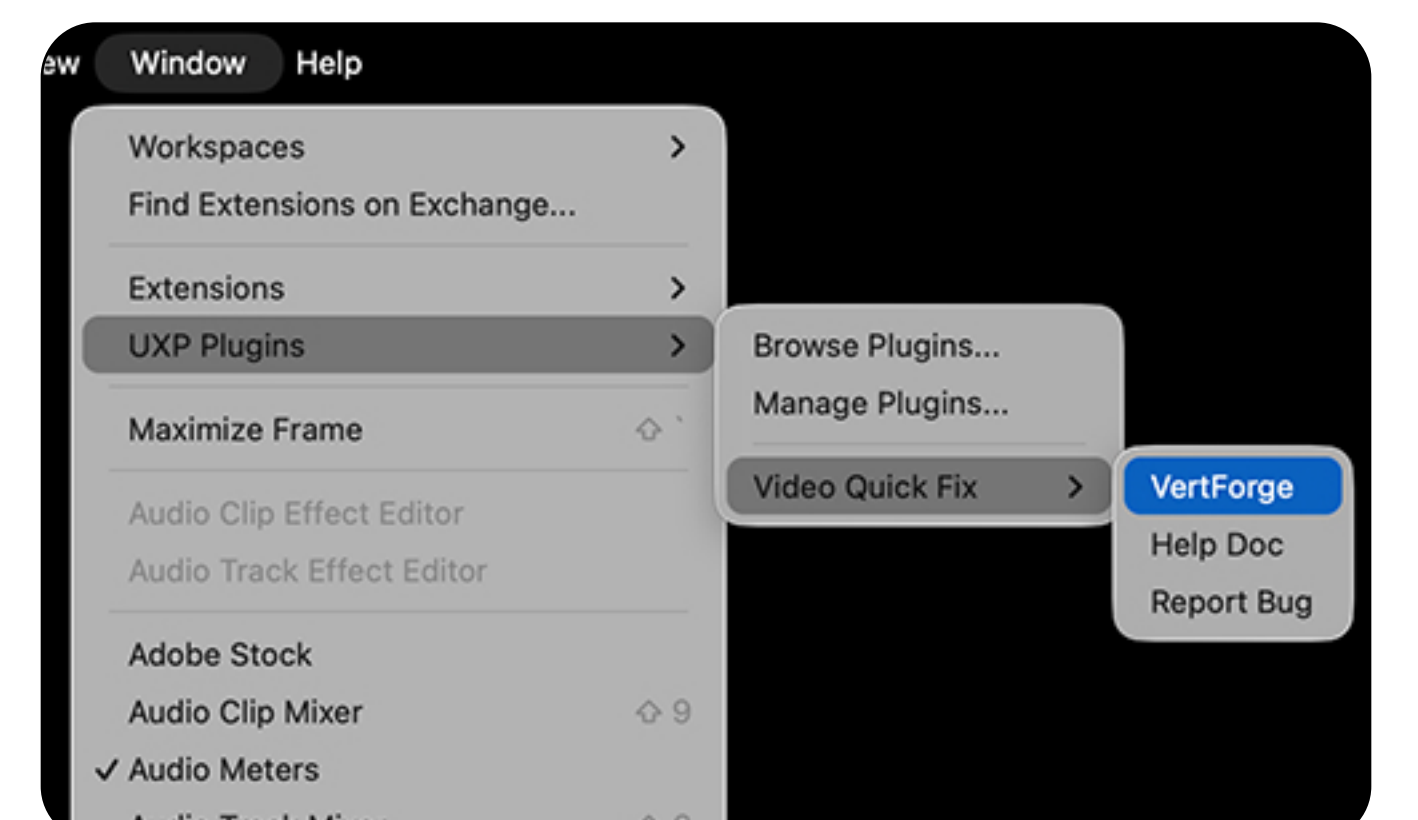

4

Launch VertForge

Window → Extensions (UXP) → VertForge

The panel opens in your workspace.

5

Activate your license

Open the ? panel → paste key → **Activate**
